

The Best Internet Telephony Solution

USB PHONE / USB PHONE S200 / S300

S200 and **S300** are full-featured USB phones which provide innovative Internet telephony solution. Using advanced VoIP technology, S200 and S300 offer clear voice quality and connect you with any regular phone user worldwide. Better yet, you could call other DSG device users for free.

▶ Intelligent Communications

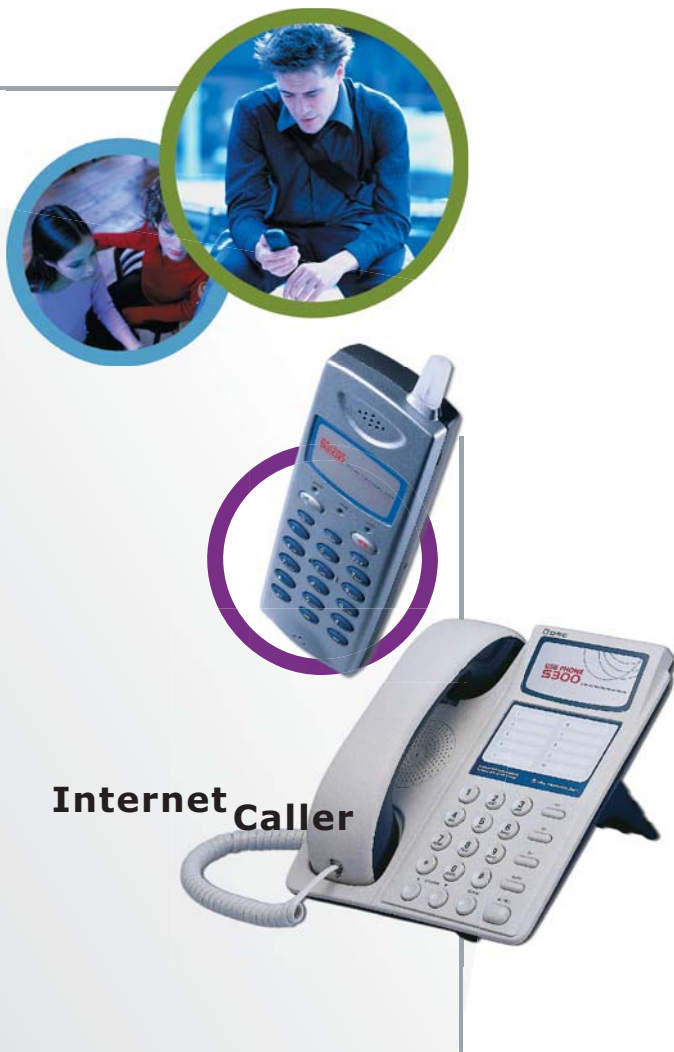

DSG S200 and **S300** are robust USB phones that make your long-distance and international call charges disappear from your phone bills. Simply connect it to your computer and you are ready to enjoy the most cost-effective Internet phone calls.

Synchronized with a powerful software DSG SoftPhone, you can also view or place calls from your computer. DSG SoftPhone offers a graphic interface allowing you to personalize your own phone book, check your account balance, browse the latest calling rates and review call history.

In addition to free PC-to-IP calls, incorporating DSG Global ITSP Network services, you can place local, long distance or international calls directly from your USB Phone or DSG SoftPhone to any regular telephone in the world at significantly low rates.

Benefits

- Provide PC-to-IP and PC-to-Phone Call Services
- Support Networks Behind Firewalls or NATs
- Great Savings on Long-Distance and International Calls
- Check Account Balance From Website
- View Call History On-line
- Superior Voice Quality

Intelligent USB Phone

Software Features

DSG SoftPhone is a software application running on your computer that synchronizes with USB Phone S200/S300. DSG SoftPhone provides a web-based interface that facilitates your calling processes and allows you to manage your account more easily.

By incorporating world-class DSG ITSP Network services, you can manage your account, review CDR (Call Detail Record) or check the latest calling rates right on the Internet.

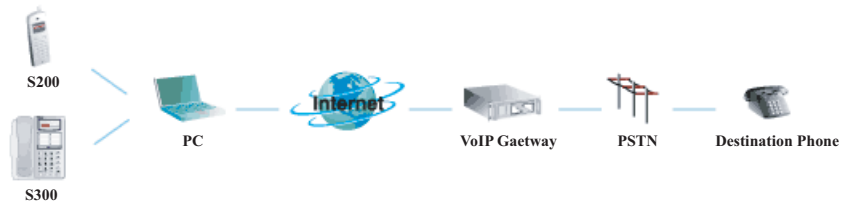

- Provide ultimate voice quality and clarity
- Support Internet access behind firewalls
- Check your account balance on the Internet
- View recent call history
- Support PC-to-Phone and PC-to-IP operation modes
- Built-in phone book

PC to Phone Communication

PC-to-Phone Mode

Enjoy the ubiquitous DSG ITSP Network services which allow you to call any regular phone number in the world with low calling rates. User friendly design makes it no difference to place calls as the way you normally would on regular phones.

PC-to-IP Mode

You could also call other DSG VoIP devices like IPStar, InterStar, InterPhone, IP770, IP870 or DSG SoftPhone by dialing the receiver's real IP address. The only thing required is that both sides are connected to the Internet.

System Requirements of PC

- Windows 98SE, ME, 2000 or XP
- Pentium 166 or higher
- 10 MB HD space
- Available USB port
- CD-ROM drive
- 32 MB RAM
- Internet Access
- Microsoft Internet Explorer 4.0 or later
