

Corporate PROFILE

DSG Technology

DSG Technology is a unique company; a trustworthy technology company that understands the New Economy is all about logical thinking. Consequently, DSG is committed to healthy competitions. DSG strives for continuous innovation and technological advancements to bring powerful yet sensible solutions.

Today, DSG is a world-class contributor in the Internet and Computer Telephony industry, with a reputation for leading technologies and reliable products and services. Yet, DSG aims to be *The Total VoIP Solutions Provider* for businesses of all sizes and shapes across the globe. With this goal in mind, DSG continues to deliver complete lines of VoIP products and services that satisfy virtually every market segment: carriers, ITSPs, enterprises, SOHOs and consumers. This enables all DSG customers to take full advantage of the benefits of the latest telecommunication solutions.

Finally, a technology company that gives people and organizations of the New Economy what they really want.

Solution Provider

Continuous Inn

Vision

"We want to meet the needs and requirements of all customers, therefore we developed an integral Internet telephony network structure that provides support for changing market circumstances and for the evolving management itself."

Learning Steps

Founded in 1997, DSG Technology immediately started to lay the foundations of its worldwide Phone-to-Phone Internet Telephony Network with the introductions of a NT-based VoIP gateway, sophisticated Gatekeepers and Billing Systems. Subsequently, DSG amazed the world with the introduction of embedded dial-up CPE in 1998 and Ethernet CPE in 1999, to supply to all network environments and VoIP applications. As the pioneer and leader of Device-to-Phone and Phone-to-Device solutions, DSG also offers unparalleled user-friendly services with its Internet Telephony Networks, which further extends communications between the Internet and PSTN.

In 1999, DSG merged with its sister company, DSB Technology, a leader in Computer Telephony technology and products with market dominance. Through this acquisition, DSG dramatically improved the capability to integrate VoIP and CTI technologies and to explore new generation technologies such as IP-PBX system, network-based unified messaging system, and multimedia contact center.

Global Presence

With corporate headquarters located in Taiwan, DSG Technology is among the fastest growing Hi-Tech firms of the Asia Pacific Rim. With offices and strategic alliances in more than 30 countries in every continent of the world, DSG has established a true global presence.

Other key members of the DSG Group include DSG Technology USA and Ecomer Technology.

novation

DSG Technologies

A prime objective of DSG Technology is to develop and sculpt an integrative, flexible yet cost-efficient Internet Telephony architecture known as InterPhoneWork.

This architecture allows the transformation of the Internet into a Virtual Telephony Switching System. With seamless interoperability, InterPhoneWork satisfies VPN, ITSP, enterprise, SOHO and individual expectations for compliance with high industrial-grade, superior quality services and wide choice selections.

Accordingly, DSG JustDialIt™ Technology brings users of DSG products transparent communication across the TCP/IP networks and the freedom to reach anyone, from anywhere, at anytime, free!

DSG core technologies can be presented in three categories:

1. ITSP Systems Technologies:

DSG addresses the carriers, ITSP, ISP and broadband operators' market with IP2000/IP3000. DSG Internet Telephony System incorporates VoIP Gateways, Call Routing Server, Billing Server, Path Searching Server, Tracking Transaction Server and ITSP

Web Manager's Site to provide the most comprehensive services in the market. These include Phone-to-Phone, Device-to-Device, Device-to-Phone, Phone-to-Device, PC-to-Phone, PC-to-Device, and Internet Voice Mail.

2. Embedded Devices Technologies:

DSG provides a series of cost-effective and powerful VoIP terminals: IPStar, InterStar and InterPhone of different interfaces to connect to PSTN, Leased Lines, xDSL, and Cable System. With DSG JustDialIt™ Technology, users of these embedded devices can easily communicate with other VoIP devices as well as regular phone users through DSG Internet Telephony Network.

3. IP-PBX System Technologies:

DSG proudly presents InterPBX™ - an advanced IP-PBX system that extends the IP network to deliver enhanced telephony and multimedia services. Based on DSG innovative NeuralServer™ architecture and in compliance with open standards (MGCP and SIP), the capacity and functionality of InterPBX™ is fully scalable and virtually unlimited. InterPBX™ also supports either Windows NT or Linux platform. In sum, InterPBX™ is an ideal system to provide data, voice, and video integrated applications such as automated attendant, voice mail, live recording, unified messaging, web-enabled contact center, and large-scale Internet telephony services.

DSG Products

The conference of front-end and high-performance products in flexible and manageable frameworks is essential to stay ahead of the competition in this industry. At DSG Technology, we offer a complete Internet & Computer Telephony Network and a wide range of industry-standard-based products are being offered.

VoIP Embedded Devices

IPStar: Modem-Based VoIP CPE

InterStar: Ethernet-Based VoIP CPE

InterPhone: Intelligent Ethernet/PSTN Key Telephone

Wireless InterPhone: InterPhone wireless extension

Soft-InterPhone: PC-Based InterPhone

VoIP Gateways

IP1000: Embedded 4-to-8-port VoIP Gateway

IP2000: 8-24 port NT-Based VoIP Gateway

IP3000: T1/E1 High Density Embedded VoIP Gateway

CTI Products

AA9600: Embedded Auto-Attendant System

VL850: PC-Based Voice Mail System

VL880: Embedded Voice Mail System

NTRS-IV: NT-Based Multi-Channel Recording System

Software Products

Billing System: Browser-Based Account Management & CDR Servers

Gatekeepers: Tracking & Path-Searching Servers

IP-PBX:

InterPBX: Full-Featured IP-PBX System

DSG Services

On top of abundant product lines, DSG Technology also provides a comprehensive VoIP communication service network. DSG's rates are out in front. However, DSG is not just fighting a price-per-minute war. Instead, the competitive fulcrum has been changed from price to capability. DSG products and services make communication smarter and more affordable by redefining the boundaries and providing what people and organizations expect from their communication tools.

ITSP Network

InterPhoneWork: Global device-to-device, device-to-phone, phone-to-device, phone-to-phone service coverage.
